

Vinyl Sticker Transfer Instructions

Thank you for purchasing the "Changing Lives One Scan at a Time" vinyl sticker!

Your sticker has three layers. The white vinyl sticker is sandwiched between a paper backing and a sticky transparent tape layer on the top. The tape layer holds the design together so you can transfer it onto your laptop, the outside of your vehicle window, or other smooth surface.

To install your vinyl sticker:

STEP 1

Clean the surface to which you are applying the sticker. Make sure that it is completely dry before proceeding to the next step.

STEP 2

Slowly and carefully peel the clear transfer tape away from the paper backing. The white vinyl will adhere to the clear tape and lift off the paper backing.

STEP 3

Position the sticker sticky side down on your vehicle window or the surface where you want to apply it. For safety reasons, if applying to your vehicle window, please choose an area that will not obstruct the driver's view.

STEP 4

Use your fingers to apply pressure across the surface of the sticker so it firmly adheres to the surface.

Note: Once the sticker is placed sticky side down it cannot be moved without risking tearing the vinyl or distorting the design of the sticker.

STEP 5

Use the edge of a credit card to burnish the sticker firmly onto the surface before attempting to remove the clear transfer tape.

STEP 6

Slowly peel the transparent tape layer off at a 180 degree angle. The white vinyl sticker will remain on the surface.

Note: Waiting 24 hours before removing the transparent tape layer can help the vinyl sticker adhere to the surface.

Please check your state and local laws regarding the legality and placement of vehicle window stickers.
